

Advices for the safe use of Paysera

In order to use Paysera safely, first of all, please make sure that you have entered a correct address - www.paysera.* with one of the following domains:

- paysera.com
- *.paysera.com
- paysera.lt
- paysera.lv
- paysera.pl
- paysera.bg
- paysera.es
- paysera.de
- paysera.ee

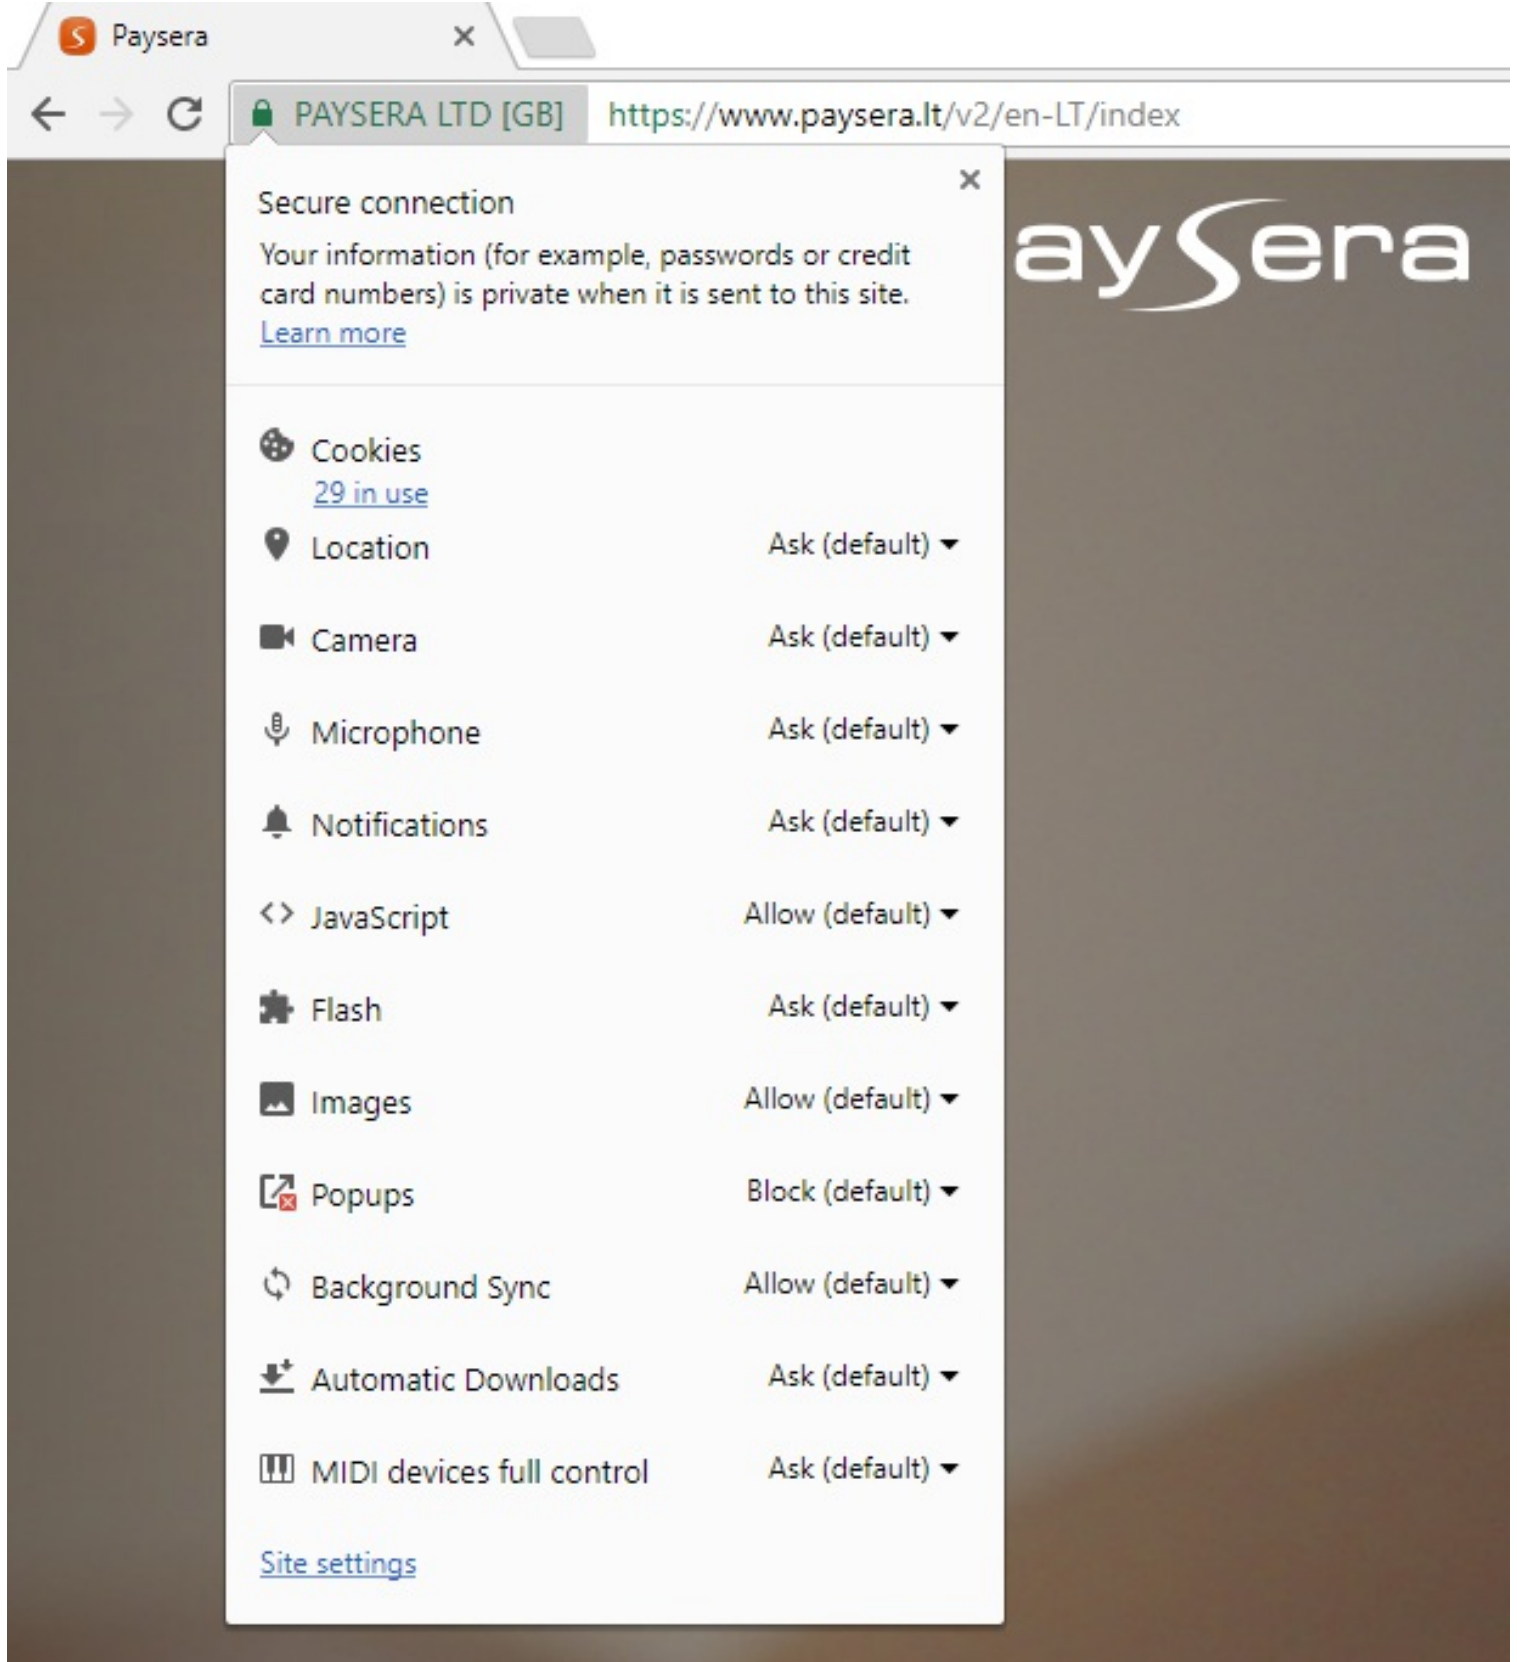

If the data differs from the given above, the website may be fraudulent and you shall not log in to such website.

Before logging in to Paysera, please also make sure that the certificate used on the website is issued by "PAYSERALTD". It can be done by entering the www.paysera.* address in the browser window and clicking on the green lock symbol by the address. It informs that the connection with the website is safe, the certificate is valid and the identity has been verified by a reliable third party.

Green lock symbol which shows that the connection is safe

After clicking on the green lock screen, the following window will appear:

Window of information about safety

(min. 8 symbols)

Repeat the password:

Name:

Surname:

Contact phone:

+370

I agree with [Paysera General payment service agreement](#), [Privacy policy](#) and [Recommendations for the safe use](#)

Open an account

Safe registration form

If the form is different or you have suspicions that the website is fraudulent, please do not enter or submit your personal data.

More recommendations on the safe use of Paysera system can be found [here](#).

International PCI DSS security certificate

PCI DSS (Payment Card Industry Data Security Standard) certificate is an international standard of security technologies and processes. This security standard regulates the requirements for companies accepting payments with cards and processing client data. The certificate confirms that Paysera complies with all security requirements. The Paysera system has the highest level standard installed, which is used to safely perform over 6 mln card transactions a year.
